## Education

**Chitkara Institute of Technology,Punjab** Jul 2019 – July 2023
Bachelor of Technology in Information Technology **CGPA: 8.90**
*Relevent coursework: Data structures & algorithms, DBMS, Computer architecture, Operating Systems, Web Development.*

**Patel Public School** May 2019
Central Board of Secondary Education **Percentage: 59.8%**

## Experience

**Corporate Technical Trainer — EdSlash** **July 2023**

- Working as a full-stack(**MERN**) and data structures(**C and C++**) trainer.
- Website updations on the edSlash official website.
- Conducted workshops and seminar for 1000+ students in various colleges in Bhopal.

**Quality Assurance Intern — Hoping Minds** **Jan 2023 - July 2023**

- Proficient in MERN stack web development: Developed web applications using MongoDB, Express.js, React, and Node.js.
- Enhanced website experience: Improved user experience and satisfaction through innovative enhancements.
- Implemented modern functionalities: Added cutting-edge features to enhance website performance and usability.

## Projects

**GoFood: Food Ordering Web Application** | JavaScript, React, Nodejs, MongoDb, HTML, CSS, Bootstrap **June 2023**

- Developed a food ordering web app using **MERN** stack, including login/signup functionality and a user-friendly interface.
- Implemented search functionality for easy food item discovery, leveraging **MongoDB** for data storage and **Express.js** for backend development.
- Implemented robust cart functionality for seamless food item selection, ordering process and order's history.
- Added "My Orders" functionality for users to view and track their previous orders, enhancing the overall user experience and providing convenient access to order history.
